EAA SportAir Workshops - Ontario

These two-day structured workshops are designed to help you build and maintain your amateur-built aircraft. You will receive an incredible amount of knowledge and confidence. These are very comprehensive courses. Course sizes are limited so that students can receive individual instruction and help. All course materials, tools, and workbooks are included.

All three workshops will be held on October 18 & 19, 2008.

COURSE FEE:

$300.00 for EAA Members ($350.00 for Non-members)

LOCATIONS:

Toronto	Sheet Metal Basics	Kitplane Builders #5 Meyerside Drive Mississauga, ON
Ottawa	Electrics/Avionics Amateur-built Aircraft Inspections	EAA Chapter 245 Hangar Carp Airport Carp, ON

SHEET METAL BASICS

This course prepares you to build any sheet metal airplane along with learning the procedures that will help you with any sheet metal repairs. The course consists of a discussion of all the basics including types of aluminum, rivets, necessary tools, cutting and drilling, dimpling and countersinking. Students will build an airfoil section.

ELECTRICAL SYSTEMS, WIRING AND AVIONICS

This course will assist you installing your entire electrical system. Definitions of electrical terms are discussed, along with information on choosing the proper wire size, how to route wires, and circuit protection. Installation of avionics and antennas is covered, Students will do wiring projects to practice new skills.

ANNUAL INSPECTION FOR AMATEUR-BUILT AIRCRAFT

The course objective is to provide the Canadian aircraft owner of an amateur-built aircraft enough training so that he or she can confidently carry out the annual inspection and determine that the aircraft is in condition for safe operation. It is based on the maintenance requirements of CAR-625 B & C.
