

Red River College Aircraft Display Information and Registration

Thank you for agreeing to display your aircraft at the Red River College Aircraft Display. The display will take place at Stevenson Aviation/Red River College 2280 Saskatchewan Avenue Winnipeg MB. on Saturday, June 19/2010 between the hours of 10:00 AM and 5:30 PM. The display will be open to the public.

Aircraft Arrival:

Aircraft access to the display area is through the gate on Apron 12 off Taxiway Golf. We ask that aircraft arrive on the day prior to the June 19th event to allow for timely positioning. Our preference is between 1 and 5 PM. Please indicate your ETA in the registration form so we may have personnel at the airside gate to meet you.

Aircraft Movement:

Our ground crew may need to move your aircraft to position it for the display. Our towbars accommodate small aircraft up to and including King Air aircraft. If your aircraft is larger, or requires special equipment, please bring a towbar and suitable chocks. We have a variety of tow tugs, including a large capacity tug for moving transport category aircraft. Please inform us of any special ground handling consideration for your aircraft.

Display, Safety Equipment, and Public Access to Aircraft:

Please bring any display signage for your aircraft if you have it. For safety reasons, aircraft interior entry will not be permitted to the public. Please bring prop tethers and intake blanking plugs for turbo-props, and wheel chocks. Please supply control locks if required. Stevenson will cordon off the aircraft for the display.

Storage and Security

Aircraft will be stored outdoors overnight in a secure, locked compound with video surveillance by RRC security. It is the aircraft owner's responsibility to ensure that the aircraft is appropriately tied down. There is some indoor storage available for very light aircraft.

Note - The airside gate will not be opened during the display.

Cancellation/ Postponement Due to Weather

If the display is cancelled due to inclement weather, the alternative date is Sunday, June 20th. If the weather on that day is unsuitable as well, the event will be cancelled. Aircraft owners will be notified by event organizers of cancellations.

Aircraft Departure:

The display ends at 5:30 PM. Please let us know when you would like to depart (using the registration form) and we will do our best to accommodate you.
