Ford TRI-MOTOR

Experience the early years of aviation on the first all metal, multi-engine commercial airliner.

The Ford Tri-Motor led to the construction of the first airline terminal for passengers and was the first regularly scheduled passenger airliner to operate. Among its places in history, the Ford Tri-Motor led to the creation of the first paved runway and to the first hotel, designed and built for the air traveler.

Visit us at flytheford.org for more information about the Ford Tri-Motor tour, Tri-Motor history and to book your flight.
