## TRI-MOTOR

Experience the early years of aviation on the first all metal, multi-engine commercial airliner.

The Ford Tri-Motor led to the construction of the first airline terminal for passengers and was the first regularly scheduled passenger airliner to operate. Among its places in history, the Ford Tri-Motor led to the creation of the first paved runway and to the first hotel, designed and built for the air traveler.

Visit us at [flytheford.org](http://flytheford.org) for more information about the Ford Tri-Motor tour, Tri-Motor history and to book your flight.
